

NEW AGE FUNERAL CENTRE

Re-shape the way we say goodbye.

PROJECT INTRODUCTION

The project aims to design a funeral center where the design will prioritize the emotional and psychological needs of the bereaved and their families. Through a user-centred design approach, this project will explore how the physical design of a funeral center can create a more supportive and adaptive environment for grieving people.

RE-DESIGN

FLOOR PLAN

In the design of the funeral center, circles can be used to create a sense of calm and peace by evoking a sense of continuity, unity, and eternal life. The circular shape can be used in various ways throughout the space layout, such as in the structure, furniture, and decorative elements.

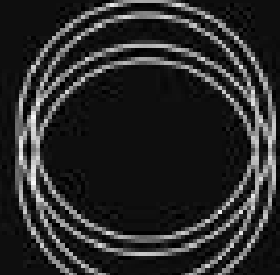

The circle is the central design element in the project and will be prevalent throughout. As a shape, it is uninterrupted and unbroken, symbolizing that death is not the end of life, but forgetting is.

The floor plan will feature a clockwise circular activity path for visitors, with service rooms positioned along the route to indicate the completion of the funeral preparation process and the passage of life and memories.

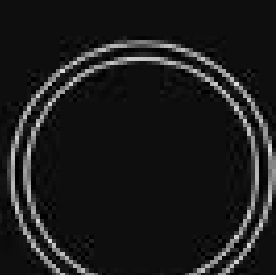

DESIGN ELEMENT

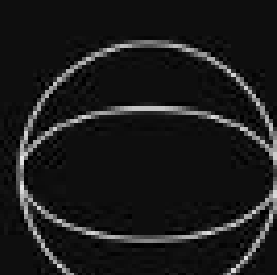

MEDITATION

DREAMING

BREATHING

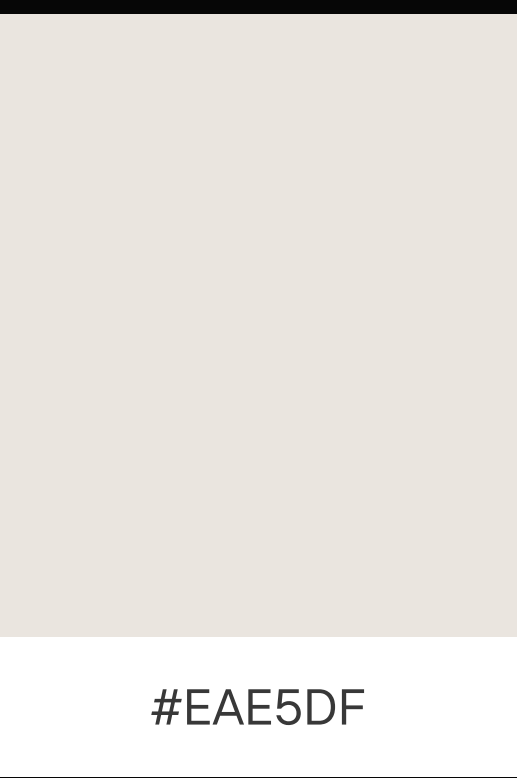

FOCUSING

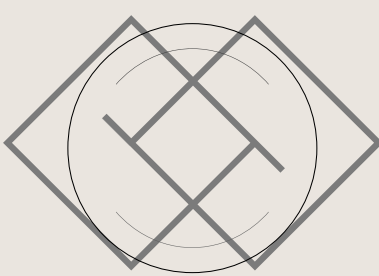

COLOR PALETTE & MATERIAL

The main colour palette for the design will draw inspiration from natural elements. The design can create a sense of harmony and connection with the environment by looking at the colours found in nature.

MAIN SPACES

Office, Stair Feature, Gathering Hall

"Re-thinking funeral experience:
Honoring the lives we've lost
with more love, more meaning,
and more memories."

New Age Funeral Centre

Re-shape the way we say goodbye.

The central lounge area will feature a curved glass wall, creating a stunning visual centrepiece that enhances the overall design aesthetic. The curved glass wall will not only be visually striking but will also allow for an abundance of natural light to enter the space, creating a bright and inviting atmosphere.
