Daylight

Workspaces are a vital part of our day; young adults need a space to support their stress levels and harness creativity. The concept of daylight will be driving this innovative library design to create a warm welcoming environment for students and staff. Often symbolizing intellectual thought, and prosperity, daylight is a central element to all growth and life. Through the library redesign, the use of a bright and airy colour palette, organic lines, intricate light and shadow detail, and natural elements will provide a warm safe haven for all students to thrive and grow.
